

Webworks has been such a blessing to us! We have been so pleased with the high quality of academics alongside the sound Biblical perspective of each class. The teachers are so helpful and easy to work with and the class formats are well organized and easy to follow.

~ M. Schreur, Iowa

This school year has been our first experience with the Webworks program. From start to finish, we have been impressed with the people and technology involved with it. Wanda Burdick has been great about helping this technologically challenged mom with set-up and other computer issues. Jennifer Yancey has been a fantastic instructor training our son in computer programming, but more importantly in godliness. We highly recommend Webworks to all home school families.

~ Anita Hepler, Michigan

“Our online experience with Webworks has been excellent. The live classroom interaction is stimulating and creates a sense of "being there" for both my students. These online classes help take the pressure off teaching courses I do not feel qualified for and eliminates weekly travel. Having added the online courses to my curriculum, I can confidently say, "Webworks is convenient, helpful and cost efficient". Thanks Webworks.”

~H. Kulhawick, Indiana

The interaction among the remote students and the tutor has been efficient and effective. Technical problems have been at a minimum, and the one time we did have a glitch, a make-up class was quickly convened. We're very pleased with the caliber of education our sons are receiving. The tutor takes pains to make sure the online students fully understand the material. She has spent extra online time with one of our sons to insure he understands the homework. We will take another Webworks class without hesitation.”

~ T. & L. Gustafson, Michigan
